

2013-2015 Nano Seminar Series

NSS is organized by WMINST from 2013 to 2015. It involves nano researchers in HK, the Chinese Mainland, Japan, Korea, Taiwan, Singapore and Spain. The seminar series is structured with different themes focusing on both fundamental research, technologies and applications. The seminar series also has an important subsidiary purpose of enhancing the communication between the graduate students and postdocs of the relevant research groups. It consists of 10 seminars. Some seminar were co-sponsored by HKUST Jockey Club Institute for Advanced Study and School of Science, HKUST.

Seminar topics include Catalysis with Nano Confinement, Field Effect and Valleytronic Functionality in Transition Metal Dichalcogenides, Two-Dimensional Transition-Metal Dichalcogenides, Nanocrystal Solar Cells ,etc.
